TO SHIP MASTERS.

OFFICE OF THE BOARD OF UNDERWRITTERS, 1
NEW-YORK, March 29, 1850.

There is reason to believe that disasters to vessels have recently eccurred on the Southern coast of the United States in consequence of the tree of OLD and INCORRECT CHARTS. This Board would carneotly impress upon Ship Masters the great importance of being providen with those that are of RECENT. DATE and from a RELIABLE SUURCE. Bund's Charts of the Coast of the United States are corrected in conformity with the Government Surveys, and have accurately laid down the position of all the Lights new in near or in process of construction on our coast, and these Charts should be familiar to every Ship Master in the trade.

Inspectors of vestels for the Underwriters would do well to ascertain that Masters are using proper Charts and Instruments, as a single error may lead to the most classificate result.

The following changes in Lights on the Florida Roef, it is thought proper to no ice:

SOMETHING NEW IN THE STRAW HAT TRADE.

The undersigned would respectfully represent, that for some yes past they have apprecial ad the justice of the remarks made by a Trade while making their Spring purchases, wis: "Trade sit as yies were introduced so late in the essaon, they were compared to make their heaviest purchases without waiting than pixel themselves under a disadvantage which the retailer and of who purchase later avoided, untend of giving them the opportunity of better selections from larger assertionants, at prices to wrant their heaviest purchases;" and while assenting to the first of such representations, the undersigned have also endeaved for remedy the difficulty, so far as lies in their power. In furth once of this desirable change, they now invite special attention the
